Full-Stack Developer focused on scalable web applications, realtime systems, modern UI/UX, and AI-integrated products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React.js, Next.js, Tailwind CSS, Framer Motion
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases & ORM: MongoDB, PostgreSQL, Prisma
Tools & Technologies: Git, GitHub, Docker, Postman, WebSockets, Cloudinary, Cursor

PROJECTS

Syntra Mar 2026 – May 2026

React, TypeScript, Node.js, MongoDB, Socket.IO, Tailwind CSS | Live | 🐙 Code

- Built a full-stack AI-enhanced social and dating platform focused on meaningful interactions and realtime communication.
- Implemented JWT authentication, Google OAuth, protected routes, and secure cookie-based session handling.
- Engineered realtime messaging using Socket.IO with persistent chat storage and dynamic conversation switching.
- Designed modern responsive UI with Tailwind CSS and Framer Motion featuring glassmorphism aesthetics and smooth animations.

Obsidian RPG Learning Engine Hackathon Project | 2026

React, Express.js, MongoDB, Socket.IO, Phaser.js, Gemini AI | Live | 🐙 Code

- Collaborated in a hackathon team to build a gamified AI-powered RPG learning platform with realtime gameplay systems.
- Developed frontend experience and backend architecture while collaborating on Phaser.js-based gameplay mechanics.
- Built responsive RPG-inspired UI using React and Tailwind CSS, receiving strong appreciation for design and UX.
- Integrated realtime systems, AI-driven learning workflows, leaderboards, and scalable backend APIs.

Leaflet Jan 2026 – Feb 2026

Node.js, Express.js, MongoDB, EJS, JWT, Cloudinary | Live | 🐙 Code

- Developed a full-stack blogging platform inspired by modern publishing applications with clean reading experience.
- Built JWT-based authentication system with protected routes, secure sessions, and password hashing.
- Implemented blog publishing, image uploads, and commenting system using MongoDB and Cloudinary integration.
- Designed complete frontend UI/UX with focus on typography, responsiveness, and editorial aesthetics.

ACHIEVEMENTS

- 1st Place — AlgoRumble DSA Hackathon**
Secured first position in college tech society's internal DSA hackathon through competitive programming and algorithmic problem-solving challenges.
- Winner — Code Crucible Hackathon**
Built **KisanSetu**, a smart agriculture platform helping farmers identify suitable crops, government schemes, and weather-based farming insights using API integrations and agricultural datasets.
- Full-Stack Development & System Design**
Built scalable full-stack applications involving realtime systems, authentication architectures, REST APIs, and modern frontend engineering practices.

EDUCATION

Bhagwan Parshuram Institute of Technology (BPIT)	2025 – 2029
<i>B.Tech in Information Technology Minor in Data Science</i>	<i>CGPA: 8.3</i>
CBSE Class XII	2025
<i>Senior Secondary Education</i>	<i>90%</i>
